Agenda

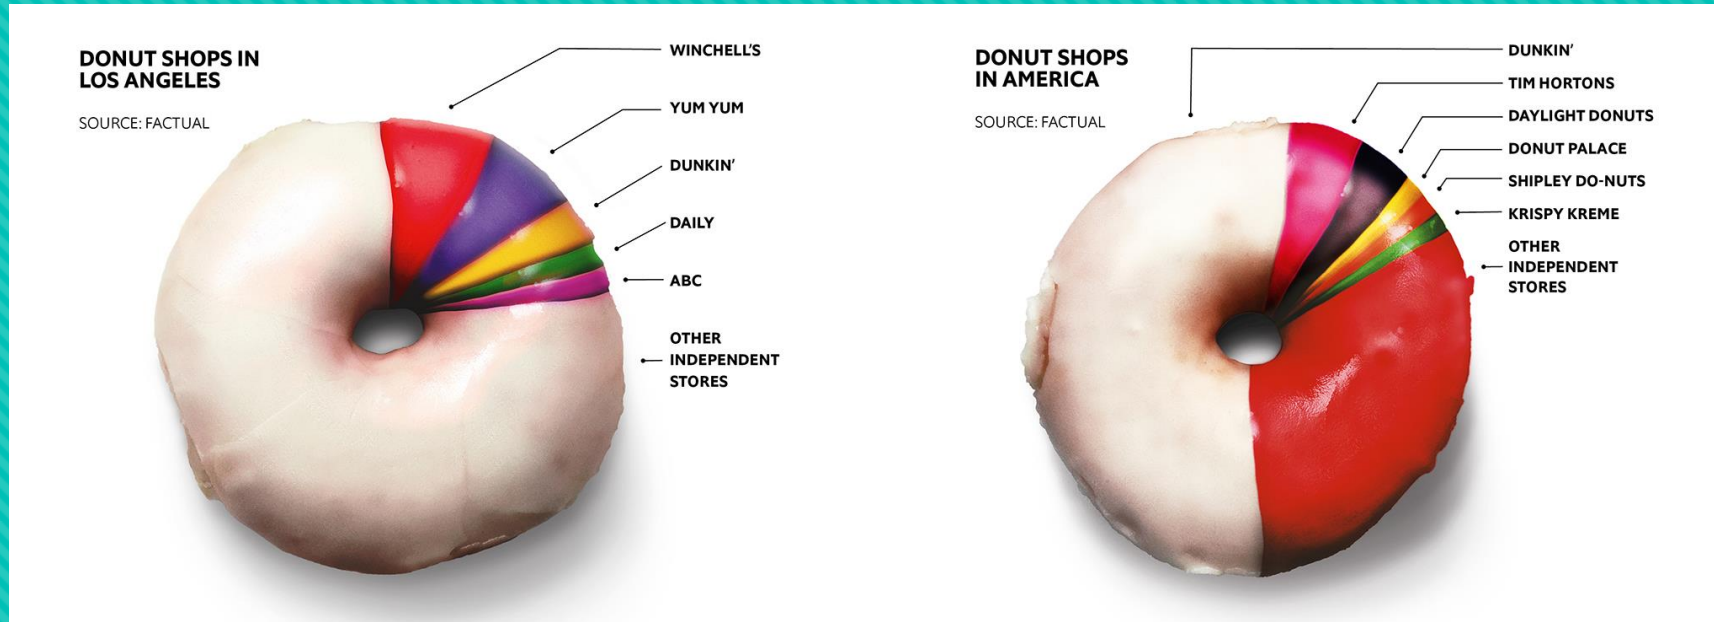

- Introduction & Learning Objectives (Dulce Delgadillo)
- CCCCCO Data Mart
- Adult Ed Pipeline Dashboard (Harpreet Uppal)
- Strong Workforce Program Dashboard (Jason Makabali)
- Student Success Metrics Dashboard (Andy Pham, Juliet Lee)
- Let's Go Data Mining!!

Learning Objectives

- Familiarize audience with what dashboards are and how to access them
- Dive into dashboards that are relevant to noncredit students and programs
- Give audience some tools on how to explore and navigate dashboards

What are data dashboards?

Data Dashboards

- “A data dashboard is a **visual display of the most important** information needed to achieve one or more objectives, with the data consolidated and arranged on a single screen so the information can be monitored at a glance” (Few, 2004).
- Data dashboards can be useful tools to track KPI's in a **timely and engaging manner**.

Key Characteristics of Dashboards

- All visualizations fit on a single screen
- Displays the most important indicators to be monitored over time
- Regular updates of data (ideally automatically)
- Is easy to understand; can be understood and used by anyone with access
- Often includes filtering and 'drill down' functions which enables users to view the data of most interest to them (e.g., filtering by location, age or gender). The visualizations then update to display only data that meet the characteristics chosen.

Questions to ask when diving into dashboards

- What question is this dashboard intending to answer?
- How often is this data refreshed?
- What types of comparisons can I do with this dashboard?
- Does the dashboard have some major limitations?
- Where can I find out more about these metrics/KPIs?
- Where can I go for help?

**Where does
